

Wagg Power Supply

Product Description

The Wagg Power Supply (WPS) is a self contained device engineered to provide 100% of the energy needs for a Wagg Dog Park installation. The WPS is capable of using an existing 120V AC service or by harvesting solar energy with included panels. Various options allow customization of the WPS for each location based on the number of Wagg components needed as well as the geographical location of the park. The solar options free facility owners from the burden and cost of running electricity to remote locations.

Key Features

- Outdoor, weather-proof enclosure
- Pole mountable design
- Customized for each location
- Designed for dog park installations

Applications

- Gated dog parks and off-leash areas
- Municipal and private dog park installations
- HOA and apartment community pet areas

Technical Specification

Parameters	Specification
Part Number: WPS-AC	120VAC Input / 24VDC Output
Part Number: WPS-170-50	Solar (170W) 50Ah @ 24VDC
